GetInt

```
graph LR; A[CodeSmile.StateMachine.Netcode.NetcodeConfig.FromCmdArgs] --> D[GetInt]; B[CodeSmile.StateMachine.Netcode.RelayConfig.FromCmdArgs] --> D; C[CodeSmile.StateMachine.Netcode.TransportConfig.FromNetworkManagerWithCmdArgOverrides] --> D;
```

The diagram illustrates three configuration methods from the CodeSmile.StateMachine.Netcode namespace pointing to a single GetInt method. The methods are: NetcodeConfig.FromCmdArgs, RelayConfig.FromCmdArgs, and TransportConfig.FromNetworkManagerWithCmdArgOverrides. Each method is contained within a white rectangular box with a thin black border. Three blue arrows originate from the right side of these boxes and point towards a gray rectangular box labeled GetInt on the right.
