

MonoBehaviour

```
classDiagram
    class MonoBehaviour
    class NetcodeState {
        +IsOnline
        +RequestStart()
        +RequestStopNetwork()
    }
    NetcodeState --|> MonoBehaviour
```

The diagram illustrates a class hierarchy. At the top is the 'MonoBehaviour' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'NetcodeState' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment contains the attribute '+ IsOnline'. The bottom compartment contains the methods '+ RequestStart()' and '+ RequestStopNetwork()'. A blue arrow with an open triangular head points from the 'NetcodeState' class to the 'MonoBehaviour' class, indicating inheritance.

NetcodeState

+ IsOnline

+ RequestStart()

+ RequestStopNetwork()
